

A Dravidian decipherment Indus script

M.V.Bhaskar and S.K.Venkatesan

We only sketch some brief outlines here. Details will be presented in a separate independent development by M.V.Bhaskar (MVB). This publication is for feedback and further elucidation on the basic decipherment for larger community of enthusiast out there in the world.

Important documents for understanding Indus script is the Corpus created Asko Parbola and [Iravadham Mahadevan's concordance](#) work. We also need the [Dravidian Entymology Dictionary](#) by Burrow and Emaneau. Please download the two PDFs from Internet Archive and you should be ready. If you want to write documents with Indus signs then you need Asko Parbola's NFM Indus Script font. This document was written in that font, a lovely gift from MVB to me. Now on to the beautiful discovery of the decipherment.

This decipherment became possible with the arrival of the splendid work by MVB in Sasanam: M.V. பாஸ்கர் (Bhaskar), அன்றைய தலைப்பு செய்திகள் (Yesterday's headlines), சிந்துவெளி நாகரீக சிறப்பு வெளியீடு (Indus Valley Civilization Special Issue), கிருஷ்ணகிரி மாவட்ட வரலாற்று ஆய்வு மையம் (Krishnagiri District History Research Center), சாசனம் (Sasanam), 2025.

This laid down the map that lead to all the linkage between graphics and the text, building this beautiful journey of discovery enabled by M.V. Bhaskar, with whom I have been working for the past several years. My learning in art, Brahmi and Indus Script derived from his interactions.

Numbers

Numbers are treated separately, but they are just like other glyphs, easily welded and affixed to other glyphs, producing a plethora of possibilities.

M77 Sign	Glyph	Syllable	DED	Description	Tamil

Application of above phonemes

112	''''	nam,munna	-	Healthy, before	நிலம்,முன்னால்

119	≡≡	mum-munnor	-	Two generations back	மும்முன்னோர்

Clitics

Clitics provide sentence structure (the subject and the object). The reading order is right to left only after the clitics; before that the reading is left to right.

Learn through pun

Following are an indication of the pun that abounds in Indus script, which is termed as the “rebus principle”. Of course, it only makes sense if your language is close to ancient Dravidian. For deeper understanding you may have to refer to some of the sign values below this in the section on “Syllabic development”. We only sketch a few, but the Indus script syllabary abounds in such pun. They are also termed rebus principle.

M77 Sign	Glyph	Syllable	DED	Description	Tamil
298))))	valai = vala+ai	-) = vala+5	வல+ஐ=வலை

Right-parenthesis is “vala” (curved as well as right) in Tamil and “vala” + “ai” = “valai”. This is further explained by a pun statement shown in the next row.

62	(ஃ)	valai-kanni	-	vaalai fish	வாளை மீன்
----	-----	-------------	---	-------------	-----------

The fish “vaalai” is known as the shark fish that has sharp teeth. A nice tooth is drawn at the top to elucidate the learning. This explains that the parenthesis sign (299,287) carry the phonetic value “valai”.valai-kanni

63	(ஃ)	kanni-pori-valai	-	Trapping of birds	கன்னி-பொறி-வலை
----	-----	------------------	---	-------------------	----------------

This learning tablet defines the phonetic value of fish as “kanni” and the bird as “puri” by defining it through a polysyllabic pun as “kanni-pori”with a parenthetic

“valai” . The “kanni-pori” in Tamil is “trapping”.

64	𑌵 (𑌵)	valai-kanni	-	The clitic reverses reading order	கன்னி-பொறி- வலை
----	-------	-------------	---	---	--------------------

The clitic sign 64 reverses the reading order to the right of it. This learning script defines that.

376	𑌶	pal	-	teeth	பல்லு
-----	---	-----	---	-------	-------

A teeth is indicated by the protruding teeth effect, just like in the fish teeth.

Syllabic development

We outline from top to bottom how the syllabary is developed. We outline entries that are learning signs that give us clue on understanding the development (like “a” for “apple”, but in a funny/punny way). Happy journey!
