# A Dravidian decipherment Indus script

M.V.Bhaskar and S.K.Venkatesan

We only sketch some brief outlines here. Details will be presented in a separate independent development by M.V.Bhaskar (MVB). This publication is for feedback and further elucidation on the basic decipherment for larger community of enthusiast out there in the world.

Important documents for understanding Indus script is the corpus created by Asko Parbola and Iravadham Mahadevan's concordance work. We also need the Dravidian Etymological Dictionary by Burrow and Emaneau. Please download the two PDFs from Internet Archive and you should be ready. There are two excellent software versions of these PDFs: Iravadham Mahadevan's concordance maintained by Roja Muthiah Research Library and Dravidian Etymological Dictionary maintained by Digital South Asia Library of the Chicago University. Another rich source of conjectures and data is the great work of Bryan Wells: The Archaeology and Epigraphy of Indus Writing, Archaeopress, 2025, who also has an excellent online database.

If you want to write documents with Indus signs then you need Asko Parbola's NFM Indus Script font. This document was written in that font, a lovely gift from MVB to me. Now on to the beautiful discovery of the decipherment.

The decipherment became possible with the arrival of the splendid work by MVB in Sasanam: M.V. பாஸ்கர் (Bhaskar), அன்றைய தலைப்பு செய்திகள் (Yesterday's headlines), சிந்துவெளி நாகரீக சிறப்பு வெளியீடு (Indus Valley Civilization Special Issue), கிருஷ்ணகிரி மாவட்ட வரலாற்று ஆய்வு மைய்யம் (Krishnagiri District History Research Center), சாசனம் (Sasanam), 2025.

This laid down the map that lead to all the linkage between graphics and the text, building this beautiful journey of discovery enabled by M.V. Bhaskar, with whom I have been working for the past several years. My learning in art, Brahmi and Indus Script derived from his interactions.

#### **Numbers**

Numbers are treated separately, but they are just like other glyphs, easily welded and affixed to other glyphs, producing a plethora of possibilities.

### **Clitics**

Clitics provide sentence structure (the subject and the object). The reading order is right to left only after the clitics; before that the reading is left to right.

## Learn through pun

Following are an indication of the pun that abounds in Indus script, which is termed as the "rebus principle". Of course, it only makes sense if your language is close to ancient Dravidian. For deeper understanding you may have to refer to some of the sign values below this in the section on "Syllabic development". We only sketch a few, but the Indus script syllabary abounds in such pun. They are also termed as rebus principle.

| <b>M77 Sign</b> 298 | Glyph           | <b>Syllable</b><br>valai = vala+ai   | DED<br>-       | <b>Description</b> ) = vala+5 | Tamil<br>ഖல+ഇ=ഖலെ |
|---------------------|-----------------|--|----------------|-------------------------------|-------------------|
|                     | "valai". "vala" | sis is "vala" (curved<br>is curve, as well as "<br>iis is further explaine | ʻright", which | n fits well with des          | cription of right |
| 62                  | ( <b>�</b> )    | valai-kanni  | -              | vaalai fish                   | வாளை மீன்         |

The fish "vaalai" is known as the shark fish that has sharp teeth. A nice tooth is drawn at the top to elucidate the learning. This explains that the parenthesis sign (299, 287) carry the phonetic value "valai".valai-kanni ஏரி வாளை 295 eri-valai 902 Another sharp (மீன்) tooth fish A fresh water fish, Wallago attu, also known "eri-valai", a pun again on the word with rebus equation: "vaalai" ≈ "valai". The prefix "eri" comes from "two" or "iru", leading to one more rebus equation: "iru" ≈ "eri". (∮◊) kanni-pori-valai கன்னி-பொறி-63 Trapping of birds ഖതെ This learning tablet defines the phonetic value of fish as "kanni" and the bird as "puri" by defining it through a polysyllabic pun as "kanni-pori" with a parenthetic "valai". The "kanni-pori" in Tamil is "trapping". 64 ···(众) valai-kanni The clitic கன்னி-பொறிreverses reading ഖജെ order The clitic sign 64 reverses the reading order to the right of it. This learning script defines that. (i)° 376 பல்லு pal teeth A teeth is indicated by the protruding teeth effect, just like in the fish teeth. \$ 57 irumpu 486 இரும்பு iron Now we have triple pun: iru-pu (two insects) = erumpu (ant) = irumpu (iron)

## Syllabic development

We outline from top to bottom how the syllabary is slowly developed from simple to complex glyphs. Happy journey!
